To Whom It May Concern

Please accept this letter as a support to **Ms. Jennifer Lee**'s application for a scholarship. Jennifer was my student in the *Mobile Computing and Commerce* course I have been teaching in the Faculty of Business of Athabasca University.

Mobile Computing and Commerce is a senior level three-credit undergraduate course that has two key objectives: to explore the fundamentals of mobile computing technology, including mobile communications, mobile computing applications, as well as wireless networks, security, positioning, and wireless management and support, and to analyze the impact of mobile computing and commerce on today's organizations and consumers. The course uses extensively case study analysis tools, among others. Jennifer took this course in 2015 and had very good results at all course assessments that resulted in a final grade of 95%. Course participation in peer learning discussions was remarkably high leading to a grade of 100% for this activity. This demonstrated Jennifer's capabilities in understanding and communicating clearly on mobile computing and commerce topics. Also, Jennifer obtained an outstanding 97% in a term paper requiring students to apply course knowledge in analyzing a real-life business and technology case. This proves Jennifer's skills in examining concrete business situations by using the tools offered by an academic perspective.

Taking into account all of the above, I am glad to support Ms. Jennifer Lee's application for a scholarship. Jennifer will certainly take the knowledge acquired while studying at Athabasca University at higher levels of competency.

Should you have further questions on the above, please do not hesitate to contact me.

Sincerely,

Mihail Cocosila, PhD

Professor - Management Science, Management Information Systems
Faculty of Business
Athabasca University
